

## CLIMATE AND CLEAN AIR IN LATIN AMERICA'S CITIES

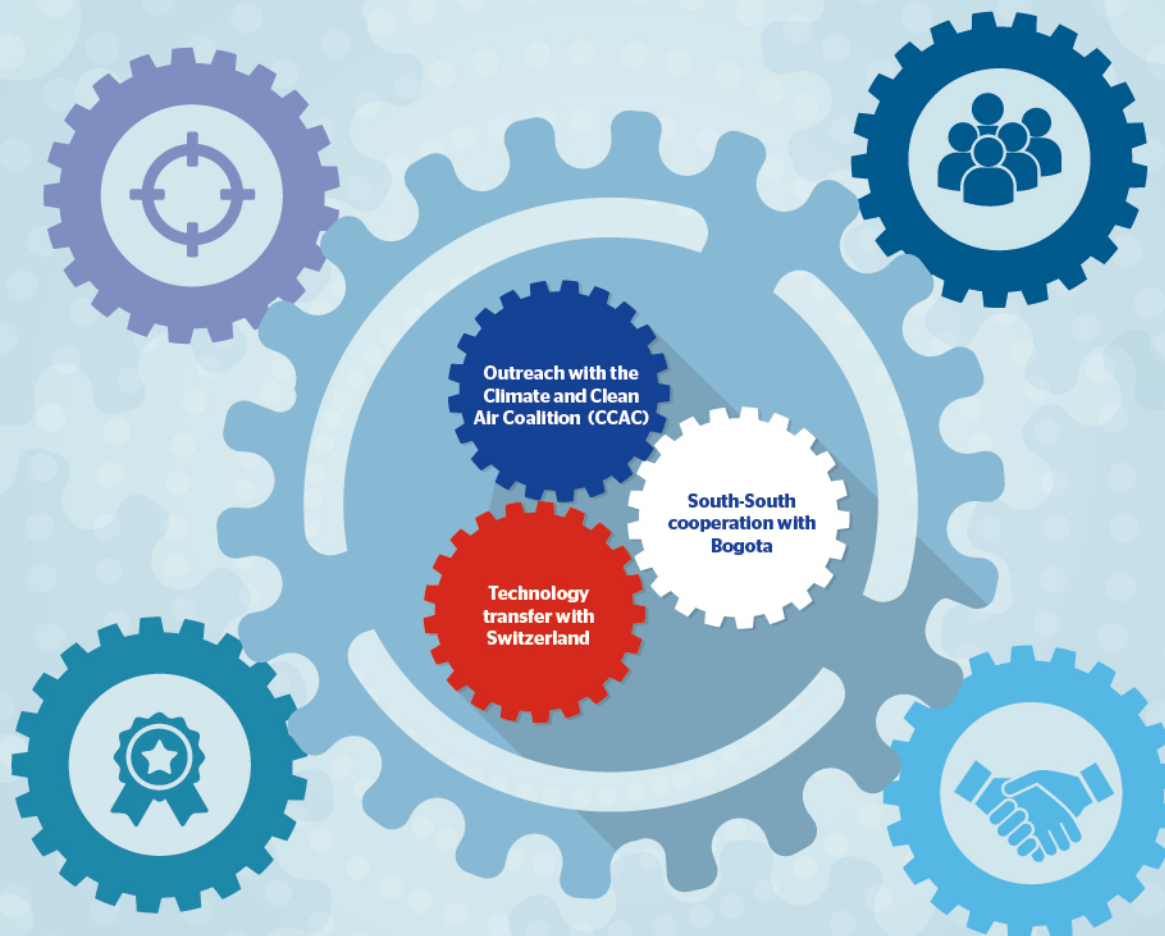

To foster the effective and speedy reduction of air pollutants harmful to human health and mitigate climate change by applying diesel particle filters (DPF) in public transit systems.

### OBJECTIVE

Black Carbon emission reductions of Santiago's Follow-Up (SFU) project are fully achieved

### MAIN RESULTS

- Improved enforcement scheme;
- Improved maintenance of DPFs;
- Capacity of local partners is strengthened;
- Potential expansion of activities to off-road machinery

### BENEFICIAIRES

6 million people in the Metropolitan Area of Santiago

### PARTNERS

- Chilean Development Agency
- Ministry of Environment
- Ministry of Transport and Telecommunications
- Transantiago
- Swiss Agency for Development and Cooperation SDC
